

Instruction for submission your program assignments

- Use the "handin" command to submit your programs. To submit your programs, use the following command:
handin eec70 hw<num> <name of your file>
For example, if your program for the first program assignment is in a file called prog1.s, you would issue the command as:
handin eec70 hw1 prog1.s
You can see what files you have submitted for a particular assignment by typing: handin eec70 hw<num> (i.e. handin eec70 hw1)
- There is no credit for late assignment.
- After submitting your program assignment, you are expected to be able to demonstrate your understanding of what you did to the TA if required.
- Your programs should be well documented.
