For all users of the DMRC lab: Please remember to abide by the Laboratory Safety Procedures laid out in the Laboratory Safety Manual at the following link; https://safetyservices.ucdavis.edu/article/laboratory-safety-manual.

With respect to the DMRC lab, this means;

- Only trained users may use the lab, this means those who have trained with Prof. Pham or with the Luhmann group on the specific equipment in the lab; no outside users are allowed.
- Closed toe shoes and long pants must be worn while in the lab.
- Appropriate use of safety eye-wear- if necessary, let us know if eye-wear is needed and we will provide this PPE to you.
- No food or drink in the DMRC laboratory.

The DMRC is a shared research lab-so, with regards to experimentation remember to notify Prof. Luhmann or Pham if you plan to set up an experiment that will introduce a new hazard to the lab, and wait for their approval. This could include, but is not limited to, :

- Laser systems
- Chemicals or chemical processes
- High Voltage power supplies

Thank you for respecting these safety procedures and if there are any questions about lab hazards or safety protocols, please let us know.
